A writer, after referring to the combination formed by New York and Liverpool speculators and Manchester spinners, to beat the Southers cotton planters out of this year's erop, as they did that of test year, and esserting that there is not the shadow of a doubt of this consider. this conspiracy, says that the receipts for ises and ises cannot possibly be greater than they were in 1867 and less. The attention of our readers is called to a case
